The Project:

Provision of Project Management Services for the Malta South Sewer Network (MSSN) System serving the entire island of Malta including the capital city of Valetta.

Tasks performed:

The Consultant's responsibility for project management functions entailed the overall monitoring of cost and progress of works, ensuring the application of state-of-the-art technology, overseeing the application of appropriate procedures for the procurement as well as for designing and building the four mentioned project components / lots and establishing project. The projects comprised four lots, all Design and Build and in particular the construction of :

- two major, new transport pipelines / galleries (33 km).
- two new pumping stations to feed the two major gravity flow galleries.
- a sewage treatment plant for the South of Malta (415,000 PE).
- treated effluent submarine outfalls of 500m to deep sea.
